***– History of Nursing of the Republic of Serbia –***

*(history through practice, work of professional organizations,  
education, heroines of our time)*

*Plenary topic: Nurses through song and poetry*

WITH INTERNATIONAL PARTICIPATION

**Towards the Seventh Congress  
of Nurses and Technicians**

**THE HISTORY WE ARE WRITING -  
A STEP FORWARD FOR A NEW  
BEGINNING**

**D**ear colleagues, co-workers and friends,  
Welcome to the seventh national congress of nurses and technicians with international participation dedicated to the history of nursing in Serbia.

For the seventh time in a row, we continue the noble mission started twenty years ago. Step by step, slowly but surely, we are writing the pages of the rich history of nursing in these areas. We are returning to our roots, learning from the past about the events that laid the foundations of our noble and above all humane profession, focused on man and his health. About the pleiade of nurses who were ahead of their time, who saw further than others, paving the way for modern nursing. Let's tear them from oblivion.

Let's write the pages of the history of our time, following the well-known maxim that what is not written has not happened, which we will leave to future generations. Let's exchange knowledge and experiences

about us and our past and present, about past years freshly etched in our memories and painful trials and feelings of the nation after the global scourge - corona. Let's leave a mark in the time of modern nursing, a profession without which the functioning of the health system of any country cannot be imagined. A profession that forms the backbone and pillar of the healthcare system, as the most numerous and the most humane. Let's highlight the importance of health care, education, professional associations, status... Let's refresh the colors of memory, inhale the fragrance and enrich our memory, show the spirit of the past, present and future.

The congress is an opportunity to return to the past, to learn about it, spreading knowledge about the roots of our profession and its pioneering steps, sufferings, stumbles and ups and downs. Let this congress be an invitation and incentive for us to remember, record, research, create, open horizons. The profession obliges us to continuously learn to adequately respond to all the challenges we face and to provide adequate and high-quality service to healthcare users.

At this congress, we went a step further in our desire to present nurses in a different light, and the plenary theme of the congress is: "Nurses in song and poetry". This is an opportunity for numerous colleagues to present their creativity and creative work and share their emotions. An opportunity to get to know the other side of our profession.

UMST KSC "Nursing" has enriched its publishing production with the richly illustrated monograph "Notable Nurses of Serbia", which was given to us by our retired colleague Milijana Matijević. The congress is an opportunity for everyone to promote her book together we acknowledge and say a big thank you.

We expect incentives and contributions not only from the participants of this meeting from our ranks, but also from distinguished guests from other professions, our associates doctors, historians, journalists, representatives of humanitarian and other associations and organizations, foreigners...

## HISTORY OF NURSING OF THE REPUBLIC OF SERBIA

---

From our dear guests, we will also learn how nursing has developed in Poland, Norway, Slovenia, Italy, Israel, Montenegro, Croatia, Republic of Srpska, Federation of Bosnia and Herzegovina, North Macedonia... So, there are many reasons for satisfaction.

This is an opportunity for all of us to mark and celebrate our jubilee, 20 years of work and existence of UMST KCS "Nursing".

With thanks to our sponsors - the Ministry of Health of the Republic of Serbia and the Chamber of Nurses and Health Technicians of Serbia and to all those who provided assistance in holding this congress, our invitation and welcome is addressed to all those who want to enrich their knowledge, to make new acquaintances and friendships, exchange experience and contribute to the successful work of the congress, of course with the points and license extension that participation brings.

On behalf of the organizers and hosts, with warm regards, we are expecting you at the beginning of September in Belgrade at the "Metropol" hotel to learn together from the past, change the present and create a better future!

I wish you successful work, new acquaintances and friendships and enjoyment of the charms of our beautiful city of Belgrade. Until the next time. Good luck

*President of UMST KCS*  
*Marija Galic*
